Are the resources occupied by local port mirroring, remote port mirroring an d flow mirroring the same resource?

Switches 周天 2020-05-20 Published

Problem Descriptior

Are the resources occupied by <u>local port mirroring</u>, <u>remote port mirroring</u> and <u>flow mirroring</u> the same resource?

Solutio

Generally, the resource consumption of the <u>local port mirroring</u>, <u>remote port mirroring</u>, and flow mirroring uses the same set of resources. Therefore, pay attention to resource planning during use to avoid the problem of insufficient resources.
