### 问题描述

问题描述:

客户之前使用V5 SR6608与思科服务器进行hwtacacs认证, 业务是SSH, 正常使用; 现在用V7SR6608替换V5SR6608 (R2420P07), 出现用户成功SSH到设备, 但是紧接着闪退的问题。

### 过程分析

目前进行的排查:

(1) 检查 V5 V7 SR6608 hwtacacs配置, 都是基本配置, 没有发现异常;

(2) 查看最初的debug hwtacacs all, 看到Processing TACACS stop-accounting., 不确定是我们收到思科的计费停止报文, 还是我们发给思科。

跟现场确认思科侧没有配置计费, 所以让现场将SR6608的计费改为none、local方式, 但是问题依旧

(认证授权都成功, 但是还是登陆成功后闪退)。麻烦研发帮忙一起看下, 谢谢! 附件是现在SR6608配置信息、以前V5SR6608配置、三次debug信息。

最初debug信息:

```
*Apr 24 17:08:14:048 2020 HN_MN_VN_AR TACACS/7/EVENT: -MDC=1; PAM_TACACS: Processing accounting reply packet.
```

```
