问题描述

某局点进行无线802.1x结合mschapv2认证，提示63121：没有接收到MSCHAPv2SERVER的认证信息报文。

过程分析

复现问题，收集iMC\mschapv2server\log下的日志。

在ChapV2JServer日志里，报错Logon failure: unknown user name or bad password，可以判断与虚拟计算机名称或者密码有关：

```
[2020-08-06 11:01:03.101] [Error] [MSChapAuth::connect]IOExceptions. Logon failure: unknown user name or bad password.>
```

```
jcifs.smb.SmbAuthException: Logon failure: unknown user name or bad password.

```

解决方法

- 1、检查虚拟计算机名称是否正确；
- 2、检查虚拟计算机密码是否正确，如果错误，请在域控上执行一下更新计算机账号密码的脚本，再重新认证下。
