Problem Description

Does the V7 wireless controller support IPv6 technology?

Solution

AC supports Client's IPv6 Layer 2 forwarding and Layer 3 forwarding

Prior to C5414, APs with more than 256M memory support IPv6 registration AC, but 128M memory does not support;

In versions after C5414, APs support IPv6 address registration to AC;

AC supports IPv6 related authentication, and supports communication with servers such as Radius and Portal Server.
