Problem Description

How to telnet AP

Solution

1. AP is not online:

Telnet AP directly, the default password is h3capadmin.

2. AP is online:

First perform the following operations on AC:

```
[H3C]probe
```

```
[H3C-probe]wlan ap-execute name *** exec-console enable
```

Then telnet can be.

The default password is h3capadmin.
