HW TACACS authentication

Problem Description

TACACS server shows successful authentication and authorization logs, but then H3C switch prompt says Login failed (see below).

Process Analysis

Try to use the configuration to test:

hwtaacs scheme marriott

primary authentication 162.130.146.67

primary authorization 162.130.146.67

secondary authentication 10.224.254.56

secondary authorization 10.224.254.56

key authentication cipher \$c\$3\$ROd8zDgPTO4DExmJySmN/E9EO6IV8y0sA1Y=

key authorization cipher \$c\$3\$K3yNRWVGHFDfIPbXGHVhH+dTLJVnIQrj/M=

user-name-format without-domain

#

radius scheme system

user-name-format without-domain

#

domain marriott.com

authentication login hwtaacs-scheme marriott local

authorization login hwtaacs-scheme marriott

accounting login none //please add this command

domain default enable marriott.com //with this command

Finally found that the problem is that accounting is not configured

accounting login none

Solution

domain marriott.com

authentication login hwtaacs-scheme marriott local

authorization login hwtaacs-scheme marriott

accounting login none
