

知 Can the CVM host name be modified after the CAS hot standby configuration is completed?

Cloud Computing 崔敬渊 2020-10-12 Published

Problem Description

Can the CVM host name be modified after the CAS hot standby configuration is completed?

Solution

Only by deleting the node can the CAS host name be modified. After CVM hot standby configuration is completed, the deletion of CVM is not supported. Therefore, the host name cannot be modified after the hot standby is configured.
