

知 AP or Client is not showed on oasis.h3c.com

Wireless 龚训杰 2020-10-12 Published

Network Topology

null

Problem Description

AP is not showed on oasiscloud.h3c.com, but the client information and AC information are displayed normally.

Process Analysis

By checking the time zone configured on site, I found that it uses domestic Oasis(Oasis.h3c.com), but actually it on-site customer uses Japanese time.

The time zone is inconsistent.

Solution

When using **oasis.h3c.com**, please adjust the time zone to Beijing time:

clock protocol ntp

ntp-service enable

ntp-service unicast-server time.nist.gov

clock timezone Beijing add 08:00:00
