

### (AP or Client is not showed on oasis.h3c.com

Wireless 龚训杰 2020-10-12 Published

# Network Topology

null

AP is not showed on oasiscloud.h3c.com, but the client information and AC information are displayed normally.

## Process Analysis

By checking the time zone configured on site, I found that it uses domestic Oasis(Oasis.h3c.com), bu t actuallyit on-site customer uses Japanese time.

The time zone is inconsistent.

When using oasis.h3c.com ,please adjust the time zone to Beijing time:

clock protocol ntp

ntp-service enable

ntp-service unicast-server time.nist.gov

clock timezone Beijing add 08:00:00
