## Problem Description

How to check the cloudos version by logging in to the cloudos background via SSH

## Solution

Execute the command `docker images | awk '{print $2}' | grep E` as follows:

```
[root@cloudos14 ~]#  
[root@cloudos14 ~]# docker images | awk '{print $2}' | grep E  
E5102-V500R001B01D030SP01-RC1  
E5102-V500R001B01D030SP01-RC1  
E5102-V500R001B01D030SP01-RC1  
E5102-V500R001B01D030SP01-RC1
```
