

## workspace E1004P04搭建双机热备失败

孟小涛 2020-10-15 发表

### 组网及说明

不涉及组网

【产品】Workspace

【版本】E1004P04

### 问题描述

搭建双机失败

### 过程分析

日志中有以下打印：

/va/log/cvm\_master\_slave.log

2020-09-08 11:59:59 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to disable liccmgr service with system startup

2020-09-08 11:59:59 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to disable auth-center service with system startup

2020-09-08 11:59:59 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to disable tomcat service with system startup

2020-09-08 11:59:59 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to disable sync service with system startup

2020-09-08 11:59:59 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to disable cmsd service with system startup

2020-09-08 11:59:59 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to disable mysql service with system startup

2020-09-08 12:00:00 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to stop docker service.

2020-09-08 12:00:00 [Node-02](ms\_service\_check.sh):PID=6161 :ln 172.100.2.102, success to stop sync, cvm\_ha service.

2020-09-08 12:20:17 [Node-02](ms\_disk\_partition.sh):PID=14327 :ERROR: ln Node-02,umount /dev/sda5 error!

搭建双机热备需要格式化主备/vms分区，系统盘sda5分区挂载到/vms下，日志中的打印说明卸载/vms失败

在双机热备的主备 服务器后台通过fdisk -l 命令 查看，发下备机后台有一个loop4设备挂载到/vms/share，这个设备是文件分发功能使用到的，需要手动卸载。

### 解决方法

【规避方法】：在备机上执行：losetup -d /dev/loop4，前台继续配置双机热备，搭建双机热备后不需要其他处理

【解决方案】该问题计划在1004P05解决，目前尚未发布，计划2020年10月下旬发布，请关注
