#### Problem Description

null

#### Solution

Answer: 50min, the server will periodically check whether the user's traffic exceeds 1024bit within 30 min

When the user is online for 10 minutes, the flow generated during the period exceeds 1024 bytes, and the connection is disconnected at this time, the flow will be zero in the next 30 minutes, so the appearance will be cleared after a total of 50 minutes
