$(m) \star Upgrade$ the firewall signature database manually

The latest intrusion prevention signature database file V7-IPS-1.0.109.dat is saved locally. Now you n eed to manually upgrade the IPS signature database offline and load the latest IPS signatures. [Version used]

This configuration example is configured and verified on the F9360 version of F1020.

Configuration Steps

- 1. Configure the interface IP address and security policy to ensure that the administrator can acce ss the device through the PC.
- 2. View the current signature database version.

C Refresh 🔌 Configure proxy server
