Desktop-E易桌面web页面报错系统错误
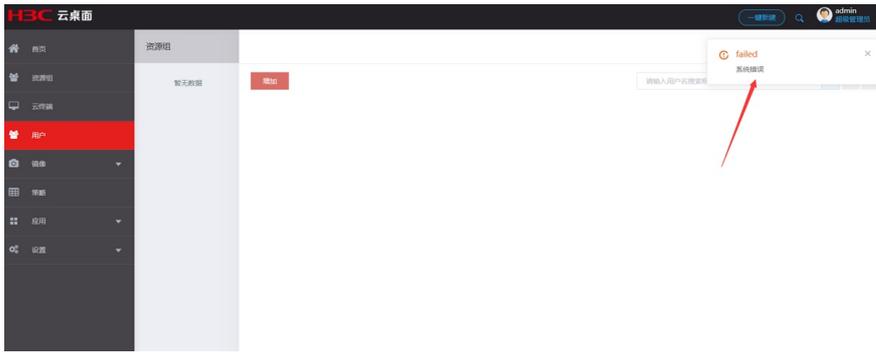

刘子溪 2021-03-26 发表

组网及说明

Desktop-E：1004p03

web页面报错如下：

过程分析

1、查看pod状态

```
[root@idv02 ~]# pod
NAMESPACE   NAME                              READY   STATUS      RESTARTS   AGE    IP              NODE
default     aquarius-core-rc-ckck1            1/1     Running     1          35m    10.101.67.4     192.168.3.251
default     aries-core-rc-9gmg5               1/1     Running     0          35m    10.101.67.5     192.168.3.251
default     athena-config-1kn48               1/1     Running     0          35m    10.101.67.7     192.168.3.251

default     mongodbrc-mm2pl                   1/1     Running     0          35m    10.101.67.17    192.168.3.251
```

过程分析

1、查看pod状态

```
[root@idv02 ~]# pod
NAMESPACE   NAME                              READY   STATUS      RESTARTS   AGE    IP              NODE
default     aquarius-core-rc-ckck1            1/1     Running     1          35m    10.101.67.4     192.168.3.251
default     aries-core-rc-9gmg5               1/1     Running     0          35m    10.101.67.5     192.168.3.251
default     athena-config-1kn48               1/1     Running     0          35m    10.101.67.7     192.168.3.251
default     athena-eureka-f6dg7               1/1     Running     0          35m    10.101.67.6     192.168.3.251
default     athena-gateway-b6xp2              1/1     Running     0          35m    10.101.67.10    192.168.3.251
default     athena-hystrix-dashboard-l4l2b    1/1     Running     0          35m    10.101.67.8     192.168.3.251
default     athena-keystone-13r6h             1/1     Running     0          35m    10.101.67.9     192.168.3.251
```

解决方法

尝试手动拉起pod

kubectl delete pod XXX   （XXX代表POD名称，请替换）
