

知 Does VLAN virtual interface support configure as source port of mirroring group?

Switches 张宇超 2021-03-26 Published

Problem Description

Does VLAN virtual interface support configure as source port of mirroring group?

Solution

At present, it is not supported. Some devices can type commands, but it is not supported after typing.

```
[S12504R-2]mirroring-group 1 mirroring-port Vlan-interface 10 both
```

```
[S12504R-2]
```

```
[S12504R-2]mirroring-group 1 monitor-port Ten-GigabitEthernet 1/0/2
```

The type of the mirroring port in the mirroring group is not supported.
