

【MSA】MSA1500 常用命令

其它功能

梁栋 2021-04-22 发表

问题描述

常用命令

解决方法

设置msa的名字

```
set prompt msa1500
```

定位某个硬盘

```
locate all (所有硬盘)
```

```
locate box 1 (box1的所有硬盘)
```

```
locate bus 1 (bus1的所有硬盘)
```

```
locate unit 1 (unit1的所有硬盘)
```

```
locate disk disk101 (disk101硬盘)
```

```
locate cancel (取消定位)
```

```
maxboot=enbaledisable (启动区4G8G,用于linux的启动分区)
```

```
cache=enabledisable (是否用控制器的cache)
```

```
delete unit 1 (删除unit1)
```

```
DELETE SPARE UNIT=2 DISK109 (删除spare盘)
```

```
show connections (查看连接)
```

(在没配置的时候,查看出来的应该是unknow状态,需要重新配置)

设置连接的主机,HBA卡的WWN

```
server1 (远端主机名,可以随便启,方便查找)
```

```
wwpn (HBA卡的wwn)
```

```
profile (值为Windows Linux HP OpenVMS Tru64 Solaris Netware)
```

```
add connection server1 wwpn=12345678-Y999999Y profile=HP
```

```
delete connection server1 (删除server1的连接)
```

```
delete connection (删除所有的连接)
```
