(m) Cloudnet Hotel management guide manual

Wireless 蒋笑添 2021-05-12 Published

Network Topology Null Configuration Steps

This guide is provide by Lifan.

1. Select the Service in top menu, then enter the "Hotel Management" service.

- 2. Enter the first menu "Net-Optimize"
 - The first button on the right side of the "Refresh" button is the "card-style" management button.

In the card view, you can view the type of each room, network score, number of terminals, upstream and downstream traffic, and other information. It can also intuitively distinguish the health of each room's network based on the color, and it can restart the AP bound to t he room with one-click, Quickly restore the room's network failure.
