组网及说明

workspace 1004

问题描述

点击登录没有反应

问题描述

点击登录没有反应

1、重启tomacat服务，发现还是不能登录

2、查看auth-center服务的状态，发现是active状态，虽然显示正常，也是可以尝试重启的，重启完发现前台页面还是不能登录

```
/dev/loop4      30G   45M   28G   1% /vms/h3cdshare
[root@Workspace-01 ~]# systemctl status auth-center.service
● auth-center.service - Auth center api server
   Loaded: loaded (/usr/lib/systemd/system/auth-center.service; enabled; vendor preset: disabled)
   Active: active (running) since Mon 2021-05-24 20:51:42 CST; 15min ago
  Process: 29847 ExecStop=/var/lib/auth-center/script/auth-api-server.sh stop (code=exited, status=0/SUCCESS)
  Process: 29861 ExecStart=/var/lib/auth-center/script/auth-api-server.sh start (code=exited, status=0/SUCCESS)
 Main PID: 29862 (java)
    Tasks: 97
   Memory: 625.1M
   CGroup: /system.slice/auth-center.service
           └─29862 java -jar -XX:+UseG1GC -Xmx512m -Xms256m /var/lib/auth-center/auth-api-server-1.0.0-SNAPSHOT.jar

May 24 20:51:42 Workspace-01 systemd[1]: Starting Auth center api server...
May 24 20:51:42 Workspace-01 systemd[1]: Started Auth center api server.
```

3、/var/log/vdi/workspace-server目录中，查看workspace日志，报错如下：

```
2021-05-24 16:35:18.850[ERROR][SockJS-4][][]org.springframework.scheduling.support.TaskUtils$LoggingErrorHandler.handleError [96] - Unexpected error occurred in scheduled task.
org.springframework.web.client.ResourceAccessException: I/O error on POST request for "http://center.authorization.h3c.com:6060/oauth2/token": Connection reset; nested exception is java.net.SocketException: Connection reset
        at org.springframework.web.client.RestTemplate.doExecute(RestTemplate.java:743)
        at org.springframework.web.client.RestTemplate.execute(RestTemplate.java:669)
```

4、可以尝试重启workspace-service的服务

```
workspace-server.service
[root@Workspace-01 workspace-server]# systemctl restart   workspace-server.service
[root@Workspace-01 workspace-server]#
[root@Workspace-01 workspace-server]#
[root@Workspace-01 workspace-server]#
[root@Workspace-01 workspace-server]# vi workspace.log
[root@Workspace-01 workspace-server]# tail -f workspace.log
```

1、重启tomacat服务，发现还是不能登录

2、查看auth-center服务的状态，发现是active状态，虽然显示正常，也是可以尝试重启的，重启完发现前台页面还是不能登录

解决方法

最后通过重启workspace-service的服务解决。
