

## 知 MSR TRAFFIC was exceeded告警含义

软件相关 刘嘉福 2021-06-01 发表

### 问题描述

设备一直有以下告警:

%May 31 02:44:33:692 2021 MSR56 DPI/4/DAC\_STORE\_STATE\_FULL: -Chassis=2-Slot=0; The storage time-based alarm threshold (AlarmThreshold(1121)=365 days) set for StoreName(1119)=TRAFFIC was exceeded.

%May 31 02:44:33:692 2021 MSR56 DPI/4/DAC\_STORE\_DELETE\_FILE: -Chassis=2-Slot=0; Delete files from the storage space of the storage time-based service because the TRAFFIC alarm threshold was exceeded.

%May 31 03:19:50:183 2021 MSR56 DPI/4/DAC\_STORE\_STATE\_FULL: The storage space-based alarm threshold (AlarmThreshold(1121)=20%) set for StoreName(1119)=TRAFFIC was exceeded.

%May 31 04:19:50:183 2021 MSR56 DPI/4/DAC\_STORE\_STATE\_FULL: The storage space-based alarm threshold (AlarmThreshold(1121)=20%) set for StoreName(1119)=TRAFFIC was exceeded.

## 解决方法

这些信息是DPI模块打印的，存储空间达上限了，审计模块的日志就是个打印，通知用户，存储空间达上限了，Delete files 了，对功能没有影响。
