

# CloudOS前台无法显示云主机列表

李毓峰 2021-09-24 发表

## 组网及说明

CloudOS版本E5102H01

## 问题描述

CloudOS前台界面无法显示云主机列表，提示如下

## 过程分析

查看cpi容器的状态和容器内的服务运行均正常，但发现三个节点根分区已经占满。进一步排查发现/opt/h3cloud/xbak/full下存在着大量的数据库备份，数量在11000左右。

```

考虑到这套CloudOS刚做过重构，因此经历过数据库备份恢复的过程。怀疑是由于数据库备份出错产生了大量的备份文件占满了根分区。

#### 解决方法

将三个节点中的数据库备份清除，重新进行数据库备份恢复的操作(参考CloudOS重构操作指导书)。完成后重启mysql集群pod和maxscale pod，再次查看前台已可以正常显示云主机列表。
