问题描述

从cvk后台连接ftp提示: 500 OOPS: vsftpd: cannot locate user specified in 'guest_username':virtual

```
Connected to 10.31.128.210.
500 OOPS: vsftpd: cannot locate user specified in 'guest_username':virtual
ftp> |
```

过程分析

cloudos后台查看glance容器，进入glance报错提示：

```
unable to find user root: no matching entries in passwd file  
command terminated with exit code 126
```

```
root@QJWY-2008-K3-CloudOSServer-1010-01 ~# pod | grep glance  
default      glance-02qhl      1/1      Running      0          330d      10.101.91.8      10.91.128.203      <none>  
root@QJWY-2008-K3-CloudOSServer-1010-01 ~# kubectl exec -it glance-02qhl bash  
unable to find user root: no matching entries in passwd file  
command terminated with exit code 126
```

查找docker官方说明，进入容器出现如上报错为docke的bug，通过stop容器再start容器解决。

解决方法

重启glance容器后恢复，cvk后台连接ftp正常。
