

SR6608公网口NAT Server 内网口NAT Outbound ACL如何匹配?

吕甲南 2017-06-20 发表

Q: SR6608公网口NAT Server内网口NAT Outbound ACL如何匹配?

A: 内网接口ACL需要匹配转换后NAT Server的目的地址

```
acl number 3001
```

```
rule 0 permit ip source 1.1.1.1 0 destination 3.3.3.3 0
```

```
#
```

```
interface GigabitEthernet0/0/3
```

```
nat server protocol icmp global 2.2.2.2 inside 3.3.3.3
```

```
ip address 10.1.12.2 255.255.255.0
```

```
#
```

```
interface GigabitEthernet0/0/2
```

```
nat outbound 3001
```

```
ip address 10.1.23.2 255.255.255.0
```

```
#
```
