客户刀片式交换机新设备开机的时候console输出如上错误。

H3C Blade5500系列刀片交换机所使用的串口是迷你型的跟USB口差不多。在通过串口登陆的时候除了要：在超级终端属性对话框中选择 [文件/属性] 菜单项，进入属性窗口。点击属性窗口中的“设置”页签，进入属性设置窗口，在其中选择终端仿真为VT100，选择完成后，单击<确定>按钮。

此时设备会提示：Notice:sm external manage disabled,can't response to console!

**这个是设备的特性，同时摁住：ctrl + T+ C。**
