

知 交换机产品DHCP报文如何流统?

DHCP/DHCP Relay 许鹏鹏 2022-03-21 发表

问题描述

DHCP报文如何流统?

解决方法

流行为里面同时匹配mac地址和DHCP报文的端口号bootps和bootpc

```
traffic classifier liutong operator and
```

```
if-match acl 3998
```

```
if-match source-mac 0401-0001-0001
```

```
acl advanced 3998
```

```
rule 5 permit udp source-port eq bootpc destination-port eq bootps
```

```
rule 10 permit udp source-port eq bootps destination-port eq bootpc
```
