

知 日志 Free resource decreased to or below minor threshold 20%

Flow日志 韩佳鑫 2022-11-17 发表

告警信息

Resource=input_flowrate_46-Total=10000-Used=8479-Free=1521; Free resource decreased to or below minor threshold 20%.

Resource=output_flowrate_46-Total=10000-Used=8481-Free=1519; Free resource decreased to or below minor threshold 20%.

Resource=input_flowrate_46-Total=10000-Used=9209-Free=791; Free resource decreased to or below severe threshold 10%.

Resource=output_flowrate_46-Total=10000-Used=9211-Free=789; Free resource decreased to or below severe threshold 10%.

问题描述

现场工程师反馈设备最近几天日志有告警，想知道该告警是否对设备性能有影响。

```
RESMON/4/RESMON_MINOR: -Chassis=1-Slot=2;  
-Resource=output_flowrate_36-Total=10000-Used=8591-Free=1409; Free resource decreased to or below minor threshold 20%.  
RESMON/4/RESMON_MINOR: -Chassis=1-Slot=2;  
-Resource=input_flowrate_0-Total=10000-Used=8571-Free=1429; Free resource decreased to or below minor threshold 20%.  
RESMON/3/RESMON_SEVERE: -Chassis=1-Slot=2;  
-Resource=output_flowrate_46-Total=10000-Used=9211-Free=789; Free resource decreased to or below severe threshold 10%.  
RESMON/3/RESMON_SEVERE: -Chassis=2-Slot=2;  
-Resource=output_flowrate_2-Total=10000-Used=9179-Free=821; Free resource decreased to or below severe threshold 10%.
```

过程分析

经H3C工程师确认，该日志是入方向和出方向报文速率的告警，是正常的打印，对设备性能没有影响

。

解决方法

正常的告警打印，如果不想打印，可以通过以下命令关闭各资源管理或者关闭log日志

```
[H3C]undo resource-monitor output syslog
```

```
[H3C]undo resource-monitor input syslog
```
