问题描述

现场想看下nqa探测历史结果，但display nqa history显示为空或者说不显示。

```
nqa entry test test
```

```
type icmp-echo
```

```
destination ip 1.1.1.2
```

```
frequency 800
```

```
out interface GigabitEthernet1/0/3
```

```
probe timeout 1000
```

```
reaction 1 checked-element probe-fail threshold-type consecutive 3 action-type trigger-only
```

```
source ip 1.1.1.1
```

```
#
```

```
nqa schedule test test start-time now lifetime forever
```

过程分析

需在nqa entry下配置 history-record enable。即：

```
nqa entry test test
type icmp-echo
destination ip 1.1.1.2
frequency 800
```

history-record enable

```
out interface GigabitEthernet1/0/3
probe timeout 1000
reaction 1 checked-element probe-fail threshold-type consecutive 3 action-type trigger-only
source ip 1.1.1.1
```

此时可正常查看history状态：

```
[H3C]dis nqa history
NQA entry (admin test, tag test) history records:
Index      Response    Status      Time
1177       1           Succeeded   2022-12-27 17:10:30.5
1176       1           Succeeded   2022-12-27 17:10:29.7
1175       1           Succeeded   2022-12-27 17:10:28.9
1174       1           Succeeded   2022-12-27 17:10:28.1
1173       1           Succeeded   2022-12-27 17:10:27.3
1172       1           Succeeded   2022-12-27 17:10:26.5
1171       1           Succeeded   2022-12-27 17:10:25.7
1170       1           Succeeded   2022-12-27 17:10:24.9
1169       1           Succeeded   2022-12-27 17:10:24.1
```

解决方法
