

知 [CB]CB1107集成对接windows 2019+exchange 2019失败

存储软件 王海伦 2023-07-03 发表

问题描述

CB1107对接 windows 2019+exchange 2019失败,在输入用户名密码后显示12:8012

过程分析

1. 首先检查兼容列表,确认1107兼容windows2019和exchange server 2019

- Microsoft Exchange Server 2019
- Windows Server 2019 (x64)

2. 检查Exchange server配置需求

Meet the prerequisites for Microsoft Exchange Server

Following are the prerequisites for the Microsoft Exchange Server integration:

- Ensure that you have correctly installed and configured the Microsoft Exchange Server environment.
 - On Microsoft Exchange Server, install **NET Framework 3.5.1**.
Note On Windows Server 2012, the installation of .NET Framework 3.5.1 is done manually and not by default.
 - In a Microsoft Exchange Server environment, if you intend to use the restore method **Restore to a point in time**, make sure that you have Microsoft Exchange Server 2010 SP1 installed.
- If you intend to run Incremental and Differential backup sessions, make sure that circular logging is disabled.
- Ensure that you have correctly installed Data Protector.
Ensure that the following Data Protector components are installed on all Microsoft Exchange Server systems:
 - MS Exchange Server 2010+ Integration
 - MS Volume Shadow Copy Integration

Micro
Con

Configure your user account with the following Exchange privileges:

- As a member of the Organization Management role group.
- As a member of the Discovery Management role group.
- As a member of the Administrators group of the Microsoft Exchange Server system on which the integration is installed.

解决方法

- 1.首先在windows 2019上安装.net 3.5
- 2.针对Exchange 用户配置必要的权限
