2;
```

#### 问题描述

两台6520X做堆叠，提示日志：The airflow direction of The two Power Fan is Different on slot 1 ,please check it

#### 过程分析

首先查看日志分析The airflow direction of The two Power Fan is Different on slot 1 ,please check it  
这个打印是电源的风扇风向问题，配置fan prefer-direction调整的是设备风扇风向，是设备插入的两个电源风扇风向不一致出现的提示。现场电源模块不一样，建议用一样的电源模块。

#### 解决方法

修改相同的电源模块之后，告警消失，故障恢复。
