

## 知 S1850V2系列交换机是否支持802.1X免认证?

802.1X zhiliao\_LxX7nl 2023-09-14 发表

### 问题描述

S1850V2系列交换机是否支持802.1X免认证?

## 解决方法

1、适用产品：S1850V2-9P/S1850V2-10P/S1850V2-26P/S1850V2-28P/S1850V2-52P/S1850V2-10P-HPWR/S1850V2-26P-HPWR/S1850V2-28P-HPWR

解决方法：支持802.1X免认证功能，具体配置如下：

- (1) 在导航栏中选择“认证 > 端口安全”
- (2) 单击<新建>按钮，进入新建安全 MAC 表项的配置页面

The screenshot shows a configuration page titled "端口安全" (Port Security) with a sub-section "新建安全MAC表项" (New Security MAC Entry). The form contains the following fields:

- 端口** (Port): A dropdown menu showing "GigabitEthernet1/0/1" with a note "(选择已使能端口安全功能的端口)" (Select the port with port security function enabled).
- 安全MAC地址** (Security MAC Address): A text input field with a red asterisk and the note "(H-H-H)".
- VLAN ID**: A text input field with a red asterisk and the note "(1-4094, 必须为该端口允许的VLAN)" (1-4094, must be the allowed VLAN for this port).

At the bottom left, there is a note "星号(\*)为必须填写项" (Asterisk (\*) indicates required fields). At the bottom right, there are two buttons: "确定" (OK) and "取消" (Cancel).

- (3) 单击<确定>完成
