问题描述

Workspace产品使用的中间件及版本

过程分析

ws使用的中间件主要有：Mysgl、Nginx、RabbitMQ、Bittorrent、Redis、Samba、Docker

解决方法

版本查看如下:

(1) mysql: mysql -v 举例如下

```
[root@workspace130 ~]#  
[root@workspace130 ~]# mysql -V  
mysql Ver 15.1 Distrib 10.6.8-MariaDB, for Linux (x86_64) using readline 5.1  
[root@workspace130 ~]#  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```

(2) nginx: nginx -v 举例如下

```
[root@workspace130 ~]#  
[root@workspace130 ~]# nginx -v  
nginx version: gateway/1.22.0  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```

(3) RabbitMQ: rabbitmqctl status | grep version 举例如下

```
[root@workspace130 ~]# rabbitmqctl status | grep version  
RabbitMQ version: 3.8.16  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```

(4) Bittorrent: /var/lib/vdi/nodes/node-linux-x64/bin/bittorrent-tracker --version 举例如下

```
[root@workspace130 ~]#  
[root@workspace130 ~]#  
[root@workspace130 ~]# systemctl status | grep bittorrent  
└─16313 grep --color=auto bittorrent  
└─4802 node /var/lib/vdi/nodes/node-linux-x64/bin/bittorrent-tracker -p 6969 --http  
[root@workspace130 ~]#  
[root@workspace130 ~]#  
[root@workspace130 ~]#  
[root@workspace130 ~]# /var/lib/vdi/nodes/node-linux-x64/bin/bittorrent-tracker --version  
0.18.6  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```

(5) Redis: redis-server 举例如下

```
[root@workspace130 ~]# redis-server  
69150:C 13 Nov 2023 10:32:04.686 # 000000000000 Redis is starting 000000000000  
69150:C 13 Nov 2023 10:32:04.686 # Redis version=7.0.5, bits=64, commit=00000000, modified=0, pid=69150, just started  
redis-server /path/to/redis.conf # Warning: no config file specified, using the default config. In order to specify a config file use  
69150:M 13 Nov 2023 10:32:04.687 # monotonic clock: POSIX clock_gettime  
69150:M 13 Nov 2023 10:32:04.687 # Warning: Could not create server TCP listening socket *:6379: bind: Address already in use  
69150:M 13 Nov 2023 10:32:04.687 # Failed listening on port 6379 (TCP), aborting.  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```

(6) Samba: smb -V 举例如下

```
[root@workspace130 ~]# smb -V  
Version 4.17.0  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```

(7) Docker: docker -v 举例如下

```
[root@workspace130 ~]# docker -v  
Docker version 17.12.1-ce, build 7390fc6  
[root@workspace130 ~]#  
[root@workspace130 ~]#  
[root@workspace130 ~]#
```
