

## 知 SR6608 BGP debug有Not receive true withdraw packet , but the route need be withdrawn.信息

张静元 2017-12-22 发表

设备S6608，版本为R3303P20，有如下BGP日志：

```
*Dec 7 14:29:53:825 2017 HWPT_BJYQB_EU1 RM/6/RMDEBUG:
```

```
BGP.: 190.0.240.118 MSG ignored : Looping in ASPATH value,
```

```
while recv UPDATE .
```

```
*Dec 7 14:29:53:826 2017 HWPT_BJYQB_EU1 RM/6/RMDEBUG:
```

```
BGP: Not receive true withdraw packet , but the route need be withdrawn.
```

```
*Dec 7 14:29:53:833 2017 HWPT_BJYQB_EU1 RM/6/RMDEBUG:
```

```
BGP. : Error identified while receiving UPDATE message from the peer 11.133.31.4 and ignored
```

```
Reason: Nexthop is one of the Interface Id.
```

```
*Dec 7 14:29:53:833 2017 HWPT_BJYQB_EU1 RM/6/RMDEBUG:
```

```
BGP. : Error identified while receiving UPDATE message from the peer 11.133.31.4 and ignored
```

```
Reason: ORIGINATORID equal to RouterID.
```

该日志意思是本端收到了一个withdraw消息，但是该withdraw中包含路由信息的originatorID为自己的routerID，故忽略了，应为环路或routerID冲突。
