

## 知 Failed to enable HTTPS server because of port conflict报错的解决方法

SSL jiangyicheng 2024-06-26 发表

### 问题描述

```
ip https ssl-server-policy test
```

```
ip https enable
```

Failed to enable HTTPS server because of port conflict.

在漏扫解决高中危漏洞时，经常需要引用ssl服务器策略，而调用https ssl服务器策略后开启https服务时会报错端口冲突

### 过程分析

查看设备上有无netconf 或restful占用了https端口导致无法调用

### 解决方法

```
undo netconf soap https enable
```

```
undo restful https enable
```

再重新应用ip https ssl-server-policy test

```
ip https enable
```
