问题描述

F5 BIG-IP 配置完成后如何保存配置?

解决方法

When you use the **Configuration utility**, it manages and automatically saves all configuration data for you as you complete each configuration task; you do not need to perform any additional steps to save configuration data.

When you use the **Traffic Management Shell (tmsh)** to configure the system, you must explicitly issue a save command to store the configuration data that you have generated. Otherwise, the newly-generated configuration data is not actually stored on the system.
