

Comware V7 如何通过命令行快速查看设备重启信息

陈少华 2016-11-28 发表

V7通过命令行查看 AP设备重启信息: [ac-probe]diag boot-info display

举例:

[WA4620i-ACN-probe]diag boot-info display

```
PowerOn BootTimes : 5
Watchdog BootTimes : 0
Software BootTimes : 763
Hardware BootTimes : 0
MotherBoard BootTimes: 0
Backup BootTimes : 0
Current Boot Type : Software-boot
Current Running Time: 960(s)
Running Time : 1(d)0(h)
```

V7通过命令行查看AC重启信息: [ac-probe]diag boot-info display

举例:

[ac-probe]diag boot-info display

Slot 1:

```
PowerOn BootTimes : 45
Watchdog BootTimes : 0
Software BootTimes : 91
Hardware BootTimes : 0
MotherBoard BootTimes: 0
Backup BootTimes : 2
Current Boot Type : Poweron-boot
Current Running Time: 607560(s)
Running Time : 276(d)0(h)
```

原有V5命令行: display reboot-type、display reboot-information 已做裁剪, V7暂无法继续使用!
