

知 S6800 不支持查看聚合口下packet-filter规则匹配数量

packet-filter

流量统计

问题描述

三层聚合口下查看packet-filter statistics, 只能看到规则内容, 无法看到规则匹配数量

解决方法

经实验室测试, 只有物理口下调用packet-filter, 且开启hardware-count功能, 通过命令才能实现以下效果

```
<Sysname> display packet-filter statistics interface ten-gigabitethernet 1/0/1 inbound
```

```
Interface: Ten-GigabitEthernet1/0/1
```

```
Inbound policy:
```

```
IPv4 ACL 2001, Hardware-count
```

```
From 2011-06-04 10:25:21 to 2011-06-04 10:35:57
```

```
rule 0 permit source 2.2.2.2 0 (2 packets)
```

```
rule 5 permit source 1.1.1.1 0 (Failed)
```

```
rule 10 permit vpn-instance test (No resource)
```

```
Totally 2 packets permitted, 0 packets denied
```

```
Totally 100% permitted, 0% denied
```
