问题描述

使用命令onestor-cli destroy --hosts 172.16.2.87销毁单节点时，提示免密失败，如下：

【ERROR】sshkey maybe broken, after solved this problem, you can destroy cluster again

```
[UniStor.cluster.destroy][WARNING] Please carefully read the following contents before you destroy UniStor cluster:
* [1] Destroying UniStor cluster will remove all UniStor packages and all Ceph data
* [2] Make sure that you are not in the directory that mounted
* [3] Forbidden to operate cluster when destroying, which causes it to be unclear
I accept and continue? (yes|no): yes
[UniStor.cluster.destroy][INFO] Begin to stop CRON services ...
[UniStor.cluster.destroy][ERROR] [172.16.2.87]:sshkey maybe broken, after solved this problem, you can destroy cluster again
```

过程分析

由于免密被异常破坏，需要修复免密。

解决方法

- 1、在后台输入命令 ssh-keygen -t rsa，然后就回车，如果让输入yes/no,输入yes;
- 2、之后执行ssh-copy-id ip（自己那个节点的ip或者127.0.0.1）

```
[root@onestor17 ~]# ssh-copy-id 127.0.0.1
/usr/bin/ssh-copy-id: INFO: Source of key(s) to be installed: "/root/.ssh/id_rsa.pub"
/usr/bin/ssh-copy-id: INFO: attempting to log in with the new key(s), to filter out an
/usr/bin/ssh-copy-id: INFO: 1 key(s) remain to be installed -- if you are prompted now
Warning: Permanently added '127.0.0.1' (ECDSA) to the list of known hosts.
```

- 3、然后输入密码，最后销毁集群即可。

```
[root@onestor17 ~]# onestor-cli destroy --hosts 172.16.2.87
