

知 V7防火墙通过QOS方式进行应用阻断

应用审计 冉博文 2015-12-31 发表

客户需要限制某些应用不能访问，比如网购中的京东，淘宝，亚马逊。

无

app-group 禁网购

description 用户自定义应用组

include application Amazon_Application_HTTPS

include application JD_Mall_Application_HTTP

include application Taobao_Buy_HTTP

include application Taobao_Chat_HTTP

include application Taobao_View_Item_HTTP

#

Qos配置：

#

traffic classifier app_deny operator and

if-match app-group 禁网购

#

traffic behavior app_deny

filter deny

#

qos policy app_deny

classifier app_deny behavior app_deny

#

接口上应用qos配置：

#

interface GigabitEthernet1/0/7

port link-mode route

qos apply policy app_deny inbound

qos apply policy app_deny outbound

#

inspect activate
