问题描述

设备信息: CR16008 Version 7.1.045, Release 7115P02

问题描述: 客户新的主控板在保存配置时, 提示保存空间不足, 无法保存配置 (no space available on device, failed to save the current configuration)。Dir发现flash显示空间total为0, free也为0, 根据现场反馈的信息, 以前flash中是已经保存过配置的。主控CR-MRP-I, 无软件已知问题。

```
<H3C>save
```

```
The current configuration will be written to the device. Are you sure? [Y/N]:y
```

```
Please input the file name(*.cfg)[flash:/startup.cfg]
```

```
(To leave the existing filename unchanged, press the enter key):
```

```
Validating file. Please wait...
```

```
No space available on device.
```

```
Failed to save the current configuration.
```

```
<CSR-VM-2.AM8>dir /all-filesystems
```

```

0 KB total (0 KB free)
```

过程分析

原因说明: 由于板卡发出默认是 CMW V5版本, 现场使用软件版本是 CMW V7 版本。Comware V5和 Comware V7在Flash中采用了不同的文件系统, V5是VFS文件系统, V7是JFFS2文件系统, 必须要重新格式化Flash, 才能正常使用Flash。

备注说明:

- 1、该升级情况下只需要重新格式化flash卡, 而不需要格式化CF卡。
- 2、后续有类似操作情景 即使用局点版本是v7的, 建议首先重新格式化下flash卡, 可以避免此类问题。

解决方法

```
<H3C>format flash: #重新格式化一下 flash, 就可以进行读写了。
```

```
All data on flash: will be lost, continue?[Y/N]:y
```

```
Formatting
```

```
flash:.....
..... Done.
```

```
<H3C>save
```

```
The current configuration will be written to the device. Are you sure? [Y/N]:y
```

```
Please input the file name(*.cfg)[flash:/startup.cfg]
```

```
(To leave the existing filename unchanged, press the enter key):
```

```
Validating file. Please wait...
```

Saved the current configuration to mainboard device successfully.
