S6850-56HF 对一个25G接口操作会影响其他三个25G接口

问题描述

问题现象： S6850-56HF version 7.1.070, ESS 6508，客户表示对一个25G接口操作会影响其他三个25G接口

H3C-33U]inter Twenty-FiveGigE 1/0/23

[H3C-33U-Twenty-FiveGigE1/0/23]duplex ?

  auto Enable port's duplex negotiation automatically

  full Full-duplex

[H3C-33U-Twenty-FiveGigE1/0/23]duplex full

[H3C-33U-Twenty-FiveGigE1/0/23]speed 10000

This command will take effect on Twenty-FiveGigE1/0/21 to Twenty-FiveGigE1/0/24, which belong to a port group. Continue? [Y/N]:y

```
#
interface Twenty-FiveGigE1/0/21
 port link-mode bridge
 speed 10000
#
interface Twenty-FiveGigE1/0/22
 port link-mode bridge
 speed 10000
#
interface Twenty-FiveGigE1/0/23
 port link-mode route
 duplex full
 speed 10000
 ip address 1.1.1.1 255.255.255.0
#
interface Twenty-FiveGigE1/0/24
 port link-mode bridge
 speed 10000
```

解决方法

原因分析：21-24属于一个端口组，这些操作在其他端口同时生效。
