

### 问题描述

V5交换机策略路由配置

### 解决方法

PBR的配置方法:

```
system
acl number 3101
  rule permit tcp
policy-based-route aaa permit node 5
  if-match acl 3101
  apply ip-address next-hop 1.1.2.2
interface vlan-interface 11
  ip address 10.110.0.10 255.255.255.0
  ip policy-based-route aaa
```

qos配置方法:

```
system-view
acl number 2000
  rule 0 permit source any
quit
traffic classifier a
  if-match acl 2000
traffic behavior a
  redirect next-hop 202.1.1.2
quit
qos policy a
  classifier a behavior a
quit
interface gigabitethernet 1/0/1
  qos apply policy a inbound
```
