问题描述

ap如何实现定时的开启射频口和关闭射频口

解决方法

方法一：

```
job radio_disable
view system
time 1 repeating at 15:00 command wlan radio disable all
time 2 repeating at 15:00 command y
job radio_enable
view system
time 1 repeating at 15:01 command wlan radio enable all
time 2 repeating at 15:01 command y
```

方法二：

```
job service1_disable
view wlan-st-1 //进入服务模板1的配置视图
time 1 repeating at 15:02 command service-template disable
job service1_enable
view wlan-st-1
time 1 repeating at 15:03 command service-template enable
```
