When 'snmp-agent trap enable vrrp' is set to H3C Switch, what is kind of VRRP trap will be output?

李玉辉　2006-07-24 发表

Two kind of VRRP trap will be output,they are "vrrpTrapNewMaster" and "vrrpTrapAuthFailure"

The trigger for "vrrpTrapNewMaster" is "The agent transitioned to 'Master'"

The trigger for "vrrpTrapAuthFailure" is "received a packet whose authentication key or authentication type conflicts with this router's authentication key or authentication type."
