

SecPath防火墙如何进入系统隐藏命令界面?

胡俊 2006-08-29 发表

系统视图下输入下划线“_”回车即可:

```
[Quidway_
```

Now you enter a hidden command view for developer's testing, some commands may affect operation by wrong use, please carefully use it with our engineer's direction.

```
[Quidway-hidecmd]
```
