

知 windows操作系统英文版安装iNode客户端使用中文场景导致iNode客户端无法启动

iNode 李树兵 2016-09-20 发表

在英文版的windows操作系统里面安装iNode客户端，如果场景名是中文的会导致iNode客户端无法正常启动。如下图：

收集iNode客户端的日志。通过查看iNodeCmm日志发现有如下错误

```
2016-06-02 14:20:33] [Info] [774] ::main =====iNode Daemon started successfully=====
[2016-06-02 14:20:34] [Warn] [84c] ProtoDirector prsCfg: log-level is 2.

[2016-06-02 14:23:33] [Warn] [858] Arp switchArpFiltr: StopArp Failed.
```

在纯英文操作系统下是不允许使用中文场景名的。纯英文操作系统，需要检查定制客户端时是否使用了中文场景名，方法为进入iNode客户端安装目录的Data文件夹，查看locations.xml文件中节点下的name属性是否为中文，纯英文操作系统可能为乱码

针对英文版的windows操作系统，用户如果可以使用中文版的操作系统可以重装中文版系统再安装iNode客户端。如果不能使用中文版系统，可以单独定制iNode客户端，使其场景名中不包含中文即可。
