

知 How does the S9500 Series Load and Upgrade Software Version via Bootrom Mode?

刘志伟 2007-01-04 发表

Software version upgrade via Bootrom mode is to download the software version through the TFTP/FTP function provided by Bootrom. For details, see the installation manual of the S9500 series. The following points need to be noticed:

1. The configuration network port does not offer the port MDI/MDI-X auto-sensing function. To connect a PC directly, the cross-over network cable must be used.
2. Remember to modify the start file after finishing downloading the software version :

MAIN MENU

1. Boot with default mode
2. Boot from Flash
3. Boot from HardDisk
4. Enter serial submenu
5. Enter ethernet submenu
6. Modify Flash description area
7. Modify bootrom password
0. Reboot

Enter your choice(0-7): 6

Please input '0' or '1' ('0':Boot from Flash, '1':Boot from HardDisk)

BootDev = 0

FlashFileName = S9500-CMW310-R1278P01-EI.APP
