

知 Does the S9500 Series Support Trans-Board Port Aggregation (Link Aggregation)

孟维佳 2007-01-23 发表

S9500 support trans-board link aggregation as well as LACP protocol based on IEEE 802.3ad.

Caution while aggregation trans-board: if the rates are different at the two ports, the port with smaller rate may be blocked and the packets may be dropped.
