

Does S9500 DHCP Support Static IP Address

孟维佳 2007-01-31 发表

You can use the dhcp relay security address-check enable at the VLAN virtual int erface to enable static IP address checking. After the function is enabled, only the st atic addresses configured with the dhcp relay security <ip_address> <mac_address> command are considered legal, while other static addresses are con sidered illegal.
