

IGMP Versions Supported by the S9500 Series

孟维佳 2007-02-06 发表

IGMP V3 (RFC 3376) has come out so far, but at present, the commonly used is IGMP V2 (RFC 2236). And few devices use IGMP V1 (RFC 1112).

The S8500 series currently supports IGMP V1 and V2 only. And V3 is planned in the new versions. If you need the V3 functions, please seek relevant information in time. (Till 31.07.06)
