

知 How Does the S9500 Series Process the 802.1Q Tagged Packets

孟维佳 2007-02-06 发表

The inbound 802.1Q tag is striped;

The outbound port 802.1Q tag is processed according to the port attribute, e.g., ACCESS, TRUNK and HYBRID.

The outbound port 802.1Q tag may be marked again according to the QOS configuration and CRC will calculate anew.
