Does S9500 Support the Outbound Access Control List/Traffic Redirection/Traffic Limitation/Port Mirroring

孟维佳　2007-02-27 发表

At present, it supports inbound access control, but not outbound access control;

supports inbound flow redirection, but not outbound redirection;

supports inbound traffic limitation according to ACL rules;

does not support outbound traffic limitation, but supports outbound traffic shaping to restrict rate. Outbound traffic shaping only restricts the rate at the port, but cannot restrict the rate according to ACL rules.

supports inbound and outbound port mirroring.
